

Technical Visit to Hong Kong GeoPark High Island Reservoir East Dam

Date: 15th February, 2015 (Sunday)
Time: 13:30 – 17:30
Location: High Island Reservoir, Sai Kung, Hong Kong
Language: English
Instructor: Prof. Gang WANG, Hong Kong University of Science and Technology

WHAT TO SEE

High Island formation is most famous for its spectacular columnar jointed volcanic rock formed about 140 million years ago as a result of catastrophic volcanic eruption. The size and extent of those columnar joints exposed at High Island Reservoir can be rarely seen in other places of the world. During the technical visit, Prof. Gang Wang from HKUST will introduce history of volcanic activities in Hong Kong, formation of columnar joints, mineral composition in the rock, and other geological features around the site.

For more information about the site, please visit http://www.geopark.gov.hk/en_s4f47.htm

TIMETABLE (may be subjected to minor change without prior notice)

13:30 Meet at the “red bird” sculpture at the Hong Kong University of Science and Technology (near North Entrance).
13:30 – 17:30 Site visit
17:30 – 20:00 (For dinner option, additional charge HK\$100 applies) Seafood at Sai Kung

REGISTRATION

Registration fees: FREE for technical visit only; or HK\$100 each for technical visit and dinner;

Space is limited on a first come first serve basis to ASCE members of all grades on or before 13th February 2015. Non-members and accompanying persons will be accepted only if there is extra space available.

CERTIFICATE

This course is recommended for 4 CPD hours. Certificates will be issued to participants upon request in advance.

ENQUIRY

Please contact the event coordinator: Dr. Gang Wang, Email: gwang@ust.hk; Tel: 23587161 (office).

Organized by American Society of Civil Engineers, Hong Kong Section
