

Technical Visit LOHAS Park Phase 4 Property Development

Date of Site Visit:	15 July 2017 (Saturday)
Time:	9:00 am to 12:30 noon
Assembly:	9:00am sharp at LOHAS Park Station
Capacity:	25 (First come, first served)

Background information as follows:

The residential project is located in MTRC Tseung Kwan O Depot development area, which comprises four high-rise towers, a podium and 2-level basement with total GFA 123,508m². The basement construction is carried out using sheet pile wall with semi top-down approach. The bored piles and socket H-piles were extended to ground level to serve as vertical supports to the ground floor slab. Steel strut preloading is also involved for facilitating the basement excavation. Special connection details have been designed to the bored piles and socketed H-piles for connecting the future basement floor slabs. The foundation work was completed in Dec 2015, the basement construction are currently proceed and anticipated to be completed by end of 2017.

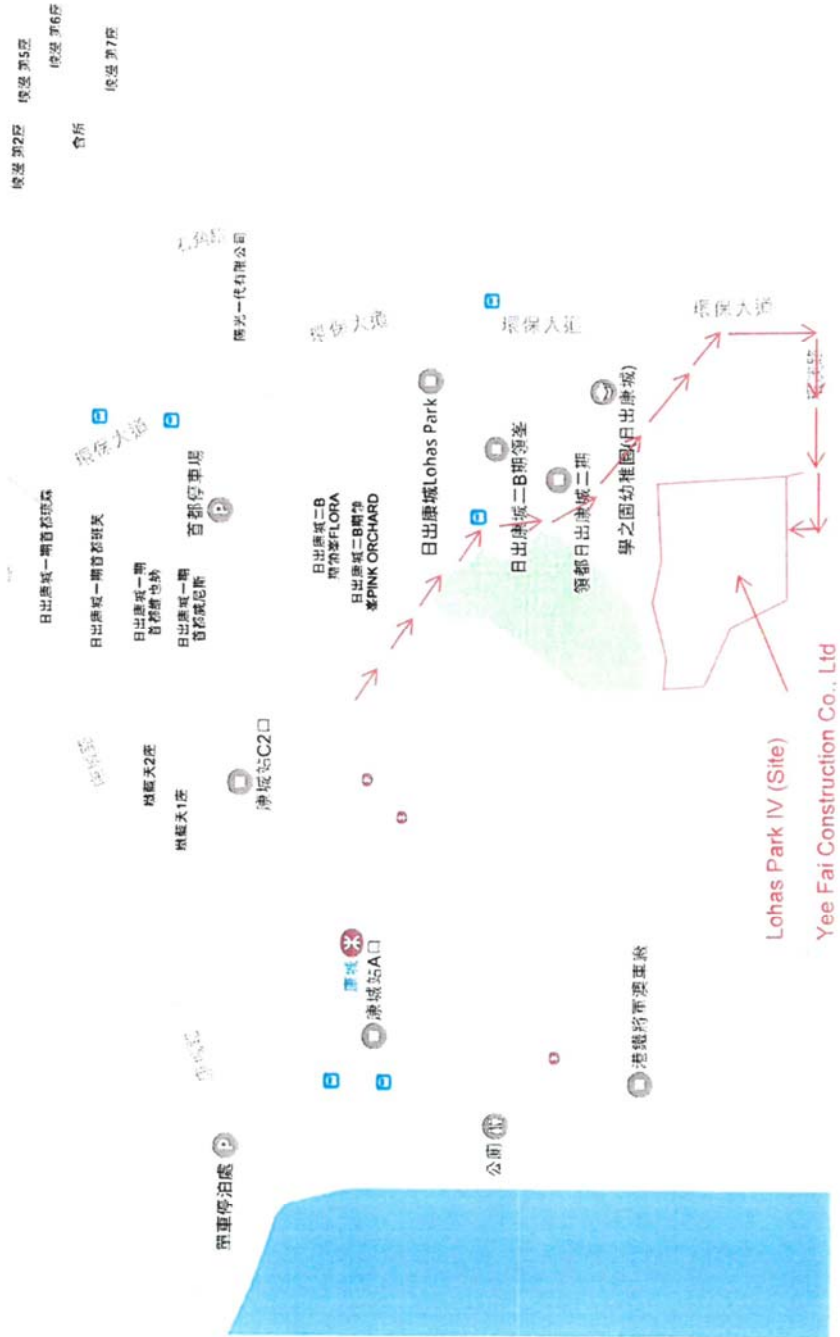

In this site visit, the participants will see the ELS works, semi-top down basement construction and associated connection details at bored piles and socketed H-piles.

**** CPD attendance certificates will be issued at the end of the visit. ****
