

Joint Annual Conference

Global Overview on Procurement Strategies for Engineering Projects: Striving for Better Values

Friday 28 March 2014

08:30 for 09:00 to 17:00

Ball Room, 18/F, Mira Hotel of Hong Kong, Tsim Sha Tsui

DESCRIPTION

Adopting the most appropriate procurement strategies is a key element that leads to the success of engineering project delivery. The procurement process spans from identification of the need, through the selection of suppliers, to post-contract award management.

This conference will gather experts from academics, private companies and public sector from United Kingdom, United States, Singapore, Mainland China, Macau and Hong Kong to share with the audience the latest procurement strategies and to provide a holistic appraisal of procurement methods. Recognition is also given to the need for innovation and research to increase competitive edge and to improve efficiency and sustainability over the whole project life cycle.
